Publisher: NetEase Games
Platform: Android, PC
Genre: Survival Shooting
OPEN BETA TEST: 2022.01.26

Game Overview

Lost Light is a survival shooting game with a background story that happened in the "Exclusion Zone" in the 2040s. OBT for Android and PC are available globally on Jan 26, 2022 (Except IN, BE, JP, KR, VN, CN). Since its Open Beta Test, *Lost Light* has ranked top 50 multiple times on the Trending New Games in Google Play Store. *Lost Light* is a game developed on three core elements – strategy, survival, and progression. "High risk, high return" is its philosophy. Apart from the intensive combats, there are so many more. Players can follow the leads of NPCs and unfold their stories or build up strength step by step to enjoy the achievement of progression. As for strategy, violence is not the only path to victory. Whether you play as a Firefly or a Marauder, you can always team up or commission others to escape. Enjoy the unique PvPE experience. Endless possibilities await.

In 2022, *Lost Light* brings new NPC, new gameplay, new outfits, new Battle Passes, and smoother combats.

- **In-operation Quests Enrich Combats**

In-operation quests add more fun to combats. Accept missions from NPCs, follow their guides, then explore in-operation mysterious rooms to get enormous rewards. Players can earn special points by finishing quests in ranked mode to exchange scarce resources.

- **Select Wisely on Respawn Points**

You can revive yourself immediately via rare items after being knocked down and go chasing your enemy with preset gear sets for revenge. However, think twice on choices of respawn points. Making the best of respawn points helps a lot when you try to take back your loot.

- **Dress to Stand out or Blend in**

Style matters on the battlefield too. Various outfits are available through the Battle Pass. Whether a camouflage skin to hide or a glamorous one to stand out, they show not just your taste but also impact your combat tactics. Whichever style you take on, the ultimate goal is the same on-to survive.

- **Real Weapons and Realistic Warfare**

Each firearm supports 12+ modifiable parts and hundreds of components. Plus, many build-in assists can help smooth your fights, such as quick equip through the blueprints and pre-aim for throwables.

- **Free Trade and Diverse Social interactions**

Players can set up shop and trade within Lost Light's player-driven economy. Trade wisely and your chance of survival increases! After you're knocked out, you could either choose to team up with a spared enemy or commission other players to rescue you—endless possibilities await! Encountering a difficult commission? Team up to complete may become a new choice.

- **Cross-Platform Play**

PC gamers can now feel the exhilaration of battle. Players on mobile devices and PC will be able to chat with one another for a cross-platform gaming experience.
