Game Overview

"Tank Company" is a massively multiplayer online tank shooting game. You can experience a large-scale 15V15 tank battle on your mobile device. Change vehicles among five tank types including self-propelled guns, and choose your strategy flexibly according to different maps to win!

The scale of the battle will be unprecedentedly upgraded, and you will join a huge battlefield where up to 30 tanks coexist. The situation of the battle will change dynamically according to the local power balance of each map. Get ready to chase victory or turn the tide. All of this starts with choosing a right offensive route, and you will always play a major role in the team.

15V15 Tank Battle On Mobile Devices

●Massive Historical Tanks Reborn with Realistic Details

The game provides a huge tank library for you to play: more than a hundred vehicles from the Soviet Union, Germany, the United States and other countries during the World War II and the Cold War are reproduced in the game with extremely high production standards. Among them are not only famous tanks that have made meritorious services in history, but also lesser-known test vehicles and newly created blueprint vehicles. We will continue to add more nations and tanks to the game to expand your options.

●Extra-large Maps Based on Real Battlefield

Many attractive maps will become the battle arena. The huge maps with 1km*1km activity space are all drawn from the locations of famous battles in history. Explore the scorching North African deserts, snow-covered Nordic towns, and war-torn tractor factories, and become familiar with how to use diverse terrain as your tactical advantage.

●Multiple Game Modes Providing Unlimited Fun

While you accumulate experience through battles, you can also grow in multiple systems in the game! You will start with basic Tier I tanks and gradually develop superior performance monsters at Tier VIII. Replace better tank parts and mount accessories and equipment that enhance different combat performance to strengthen your combat style. For your favorite tank, you can also use camouflage, decals and 3D modification to highlight your personality. If you have like-minded friends, you can form a tank platoon and tear open the enemy's defense in the huge battlefield through subtle cooperation. The game also provides more ways to help you find cohesive comrades, such as clans. The battle in the tank company is never alone!

●Ultimate Visually Stunning Graphics Unveil War Blockbuster

Through continuous improvement and adjustment of the engine, we hope to provide the best game performance on mobile devices. In the game, you will always feel the battlefield atmosphere brought by the amazing light and shadow and full-detailed scenes. And with the detailed tank models and shocking special effects, you will be more immersed in this war “blockbuster” you starred in.

Tank Company is a tank game that will continue to grow and improve. Our goal is to create a huge virtual world where you can feel the history and war atmosphere, tank battles and mechanical charm at any time. Here, every match is full of surprises due to the different combat tendencies of your teammates, maps, and tanks. Now, enter the game to start the engine!
