

## About Albion Online

**Albion Online** is a Sandbox MMORPG featuring **full-loot combat**, a **fully player-driven economy**, and a classless **"you are what you wear" skill system**. The game is **fully cross-platform**, playable on PC, Mac, Linux, iOS, or Android with a single account, and is localized into thirteen languages. Albion Online launched in 2017, launched for Steam in 2018, went free to play in 2019, and officially launched on mobile in 2021.

Rather than offering a linear path with predetermined quests, Albion Online allows players to **write their own stories** and play in countless different ways. Deep **guild, alliance, and faction** systems allow players to join up with friends and allies to claim territories and take part in massive battles. **Gathering, crafting, and trading** are all essential parts of Albion's player-based economy, offering fame and fortune for players with sufficient skill and ambition. And Albion's sprawling world, with **five biomes spread across two massive continents**, offers nearly endless opportunities for exploration and discovery, with a huge range of PvE and PvP options for solo and group players alike.

### About Sandbox Interactive

Albion Online is developed by the Berlin-based studio **Sandbox Interactive**, which was founded in 2012 by a core group of dedicated MMORPG enthusiasts and has since grown to a team of 80 people. Sandbox Interactive follows the belief that the creation of your own world and interaction with other players are paramount to entertainment, and that these ideas are truly brought to life in the sandbox genre. With Albion Online, the studio has created the world's first truly cross-platform Sandbox MMORPG – a game that places compelling gameplay and the player experience squarely in the foreground.
